VACUUM OR THERMAL FORMING

The vacuum pump, pumping system, and controls, play a critical role in speed, accuracy, and quality of the finished product.

**LET OUR EXPERIENCE WORK FOR YOU.
WE BUILD VACUUM SYSTEMS, REPAIR AND UPGRADE CONTROLS,
LEAK CHECK CHAMBERS, REPAIR PUMPS, SUPPLY PARTS, OILS,
AND FILTERS.**

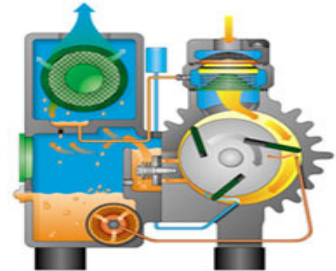

Original equipment manufacturers offer only their equipment. Most plants do not have the same vacuum or system on every machine.

We offer one source for all your vacuum pumps, parts, service, supplies, and systems. Our product and services, are field tested, and customer proven. In most cases our products are the exact same item supplied by the OEM at a substantial savings.

FILTERS AND ELEMENTS**

**VACUUM PUMPING
SYSTEMS**

WE can repair your pumps or system, supply you with a new or rebuilt unit, ship you the parts to repair it yourself, add a booster pump, even build you a new system.

If you have a Busch, Travaini, Kinney, Edwards, Leybold, Stokes, Rietschle, Becker, or any other vacuum pump on your system.

If you are vacuum or thermoforming forming plastic parts, bath ware, automotive components or anything requiring a fast pump down, time after time we have what you need, when you need it, at a cost that makes sense.

CALL US FOR ALL YOUR VACUUM NEEDS
